

DRUM ADAPTER KITS

The Drum Adapter Kit helps keep your stored lubricants free of moisture and particulate contamination while in storage or during the fluid transfer process. It also easily allows you to pre-filter your lubricant, ensuring you're only putting clean, dry oil into your equipment.

Benefits:

- Easily modify your equipment for a seamless connection to various filtration systems
- Prevents the ingress of dirt and moisture by utilizing a desiccant breather
- Customizable to fit all your needs

Features:

- Various quick disconnects with steel dust plugs allow for various configurations
- 2" NPT connection easily replaces standard drum bungs
- Replaceable desiccant breather with $\frac{3}{4}$ " NPT adapter
